TELEMATICS
INTELLIGENCE FOR TRUCK OPERATORS

COMMITTED TO THE LONG HAUL
Intelligence for Truck Operators.

Your decision to buy a Terex truck opens a world of operational advantages to you. Having made such a significant investment, you will naturally want to know your hauler is always performing to plan, particularly when it’s working remotely.

This is where Terex Trucks Telematics comes in!

Now fitted as standard to all Generation 10 Terex Trucks Articulated Haulers, our bespoke web-based Telematics system, enables registered users to have complete visibility and control of their hauler’s routine behaviour, with the captured data viewable on their desktop computers and a variety of mobile devices or, downloadable as hard copy reports.

Now, by deploying Terex Trucks Telematics, out of sight doesn’t have to mean out of mind or reach, giving you absolute control of your machine and complete peace of mind.

Our Telematics system can even be programmed to shut down a truck, remotely and safely, when the truck is inactive. This function stops the operator from restarting the truck and can protect against unauthorised movement or prevent its improper operation.

And, because Terex Trucks are all about performance continuity, Telematics undertakes continuous diagnostics, informing you of out-of-range operational parameters and providing early warnings of system faults.

Now you can have all the data you need to anticipate service events and minimise downtime at your fingertips.

And, because Terex Trucks are all about performance continuity, Telematics undertakes continuous diagnostics, informing you of out-of-range operational parameters and providing early warnings of system faults.

Now you can have all the data you need to anticipate service events and minimise downtime at your fingertips.

A New Level of Intelligence.

Using GPS technology, you can pinpoint your hauler’s location, check where it’s been and by using our Geofencing application, pre-set its work zone. Should it be moved outside this area, an alert can be sent to registered users, via a text or email.

Our Telematics system can even be programmed to shut down a truck, remotely and safely, when the truck is inactive. This function stops the operator from restarting the truck and can protect against unauthorised movement or prevent its improper operation.

And, because Terex Trucks are all about performance continuity, Telematics undertakes continuous diagnostics, informing you of out-of-range operational parameters and providing early warnings of system faults.

Now you can have all the data you need to anticipate service events and minimise downtime at your fingertips.

**Key Benefits**

- Keep assets secure
- Manage your assets
- Preventative maintenance
- Proactively control production
- Easily access the health and condition of your trucks
- Protect your investment
Man and Machine in Conversation.

NOW YOU CAN SEND TEXT MESSAGES INCLUDING OPERATING INSTRUCTIONS DIRECTLY FROM YOUR MOBILE PHONE TO YOUR TRUCK. THESE APPEAR ON A DASHBOARD DISPLAY, WITHIN THE OPERATOR’S FULL FIELD OF VIEW.

What additional value does Telematics bring?

Telematics can assist qualified decision making about:

- Scheduled maintenance planning and controlled asset management
- How to improve productive levels by observing speeds, dump counts and loads being moved
- The production of documented performance evidence
- Using “intelligence” to generate significant economies and truck resale potential

HAVING COMPLETE VISIBILITY AND CONTROL OF YOUR TEREX TRUCK PROVIDES COMPLETE PEACE OF MIND. TELEMATICS ALSO ENABLES YOU TO MAINTAIN HIGH LEVELS OF SAFETY FOR BOTH YOUR PERSONNEL AND THE ASSET BY MINIMISING TRUCK OPERATIONAL MISUSE OR NON-APPROVED OPERATIONAL PRACTICES.

So, even when your truck is in full operation, what you have to say, gets prominence. This facility is particularly useful for rental fleets or on quarry and mining sites, where communications via personal phones are likely to be prohibited for safety reasons.
Choosing the Telematics System that’s right for you.

TEREX TRUCKS HAVE DEvised A TWO TIER SYSTEM APPROACH WHICH ENABLES OPERATORS OF OUR HAULERS TO SUBSCRIBE TO A LEVEL OF TELEMATICS SUPPORT CONSISTENT WITH THE DEMANDS OF THEIR BUSINESSES.

TELEMATICS PLACES MORE OPERATING INTELLIGENCE AT YOUR FINGERTIPS. SIMPLY EXTRACT AND INTERROGATE YOUR MACHINES PERFORMANCE DATA USING A VARIETY OF EASY TO INTERPRET, FULL COLOUR PRESENTATIONS. THESE CAN BE VIEWED ONLINE VIA YOUR DESKTOP COMPUTER, TABLET AND MOBILE PHONE OR, DOWNLOADED AS PDF, EXCEL OR CSV FILES FOR FUTURE REFERENCE AND TO PRINT HARDCOPY REPORTS.
